

Meritor Parts

Meritor Parts - Meritor is a premier global supplier that is proudly established on a one hundred year tradition of service and quality. They focus on several modules, integrated systems and components to original machinery makers and the aftermarket for the industrial and transportation trades.

Meritor prides itself in the company's unique energy and feels that this energy contributes to their competitive advantage in the international operations. The business values all their customers and would like to guarantee their success while anticipating their various requirements. Meritor begins with a tradition which values diversity of people and their broad thought processes. Operating in 19 countries and hiring more than 11,200 people, Meritor promotes innovation and collaboration among a team of knowledgeable experts.

By only employing future focused people, Meritor strongly feels these top-caliber individuals will be able to rapidly adapt to changing environments and demonstrate the performance and commitment considered necessary so as to achieve results in the competitive materials handling trade. The business empowers their teams to make sound business decisions to be able to enhance the overall success of the business. In return, Meritor offers their employees various chances for personal and professional growth.

The Advanced Engineering team is on the forefront of components and system engineering. This comprises axles, drivelines, braking and suspension systems used for heavy duty and medium trucks, trailers, off-highway vehicles, buses and military vehicles. The Meritor Advanced Engineering team is developing. They opened a new technical center in Bangalore, India in September 2009 in order to lead their advanced product development initiatives that represent the whole Asia Pacific region. This team is even responsible for supporting the needs of their worldwide engineering personnel.

Meritor's dynamic and customer focused Quality team is committed to ensuring optimum processing at their aftermarket distribution facilities and production plants which are located all around the globe in 19 nations and in 5 different continents.

They have their supplier network that is particularly located in order to support the development of the business. Every regional team has globally supported initiatives, quality systems and centralized in Six Sigma and Materials Engineering. Meritor's growing Six Sigma program encourages a fact-based, data-driven approach to decision making within every part of the business. The DFSS or Design for Six Sigma ensures product reliability within each and every region. The team is likewise comprised of transactional Green Belts who utilize Six Sigma tools to business processes and apply lean techniques.
