

JLG Forklift Part

JLG Forklift Part - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV trip. After spending numerous years establishing his family built crane business with his brother, John had no idea that this journey would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road trip.

During their trip, John reacquainted himself with former business associates along the way. In combination with these conversations and a noteworthy event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered an infinite marketplace for a product that could promptly and safely elevate people in the air to accomplish maintenance and other construction services.

After returning from their holiday, John set up a partnership with two of his friends and bought a metal fabrication company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty employees, they produced and sold their first JLG aerial work platform in 1970. The company incorporates some of the simple design elements of that original lift into existing versions.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fateful cross-country journey and since the first JLG aerial platform entered the market. As of today, the business has extended itself into several international marketplaces and continues to develop new machinery to ensure that consumers are able to become safer and more well-organized within their workplace.
